

To : Atlantis Solar

Date : September 16, 2008

Dear Atlantis Solar

With this letter I would like to certify that after we test the Atlantis Solar solar air conditioning and we compare it with a non-solar air conditioning we found an **energy saving of approximately 50%** without mentioning any problem at the operation of the unit. The compare was made with an air conditioning of 12000BTU with gas R407 from the RANK series under the same operation circumstances.

For any further information about it I remain at your completely disposal.

Sincerely Yours

George Perakis
